

Table of Contents

Preface

Acknowledgements

Lesson 1:

Parametric Modeling Fundamentals – Quick Start

Learning Objectives	1-1
Creating a rough sketch	1-2
Dimensioning a sketch	1-4
Completing a sketch	1-5
Completing a Base Solid Feature	1-6
Dynamic Viewing Functions	1-10
Changing the Appearance of the Model	1-12
Review Questions	1-13

Lesson 2

Work Features

Learning Objectives	2-1
Creating Edge/Edge Work Plane	2-4
Modifying a Work Plane	2-5
Creating Edge/Angle Work Plane	2-5
Creating an Offset Work Plane	2-6
Work Axis	2-7
Create a Work Axis using two Points	2-7
Create a Work Axis through a Point	2-8
Work Points	2-9
Review Questions	2-11

Lesson 3

User Interface

Learning Objectives	3-1
Properties Dialog Box	3-4
Summary Tab	3-5
Project Tab	3-6
Status Tab	3-7
Custom Tab	3-8
Save Tab	3-9
Physical Tab	3-10
Projects	3-12
Setting Up a Project	3-12
Options Dialog	3-15
General Options	3-16
Opening a Previous File Version	3-18
Color Options	3-19
Display Options	3-19
File Locations	3-20
Drawing Options	3-23
Notebook Options	3-24
Sketch Options	3-25
Part Options	3-26
Design Element Options	3-27

Lesson 3

User Interface (continued)

Assembly Options	3-28
Review Questions	3-29

Lesson 4

The Standard Toolbar

Parameters	4-4
IPart Table	4-5
Create Interface	4-5
Zoom All	4-6
Zoom Window	4-6
Dynamic Zoom	4-6
Pan	4-5
3D Rotate	4-7
Look At	4-8
Design Doctor	4-9
Review Questions	4-11

Lesson 5

The Features Toolbar

Extrude	5-1
Revolve	5-3
Creating a Revolve	5-4
Hole	5-7
Shell	5-10
Rib	5-12
Adding a Rib	5-13
Loft	5-17
Sweep	5-19
Coil	5-20
Thread Tool	5-23
Fillet	5-23
Chamfer	5-28
Face Draft	5-30
Applying a Face Draft	5-31
Split	5-32
View Catalog	5-33
Insert Design Element	5-34
Create Design Element	5-37
Derived Part	5-40
Rectangular Pattern	5-42
Circular Pattern	5-43
Mirror Feature	5-44
Create Work Plane	5-45
Work Axis	5-46
Work Point	5-46
Review Questions	5-48

Lesson 6

Sketch Tools

Edit Coordinate System	6-1
Line/Spline	6-1
Circle/Ellipse	6-2
Arc	6-2
Rectangle	6-2
Fillet/Chamfer	6-3
Point, Hole Center	6-4
Mirror	6-4
Offset	6-10
General Dimension	6-11
Auto Dimension	6-12
Extend	6-13
Trim	6-13
Move	6-14
Rotate	6-16
Constraints	6-17
Show/Delete Constraints	6-18
Project Geometry	6-19
Project Cut Edges	6-19
Project Flat Pattern	6-19
Insert AutoCAD file	6-20
Reattach Sketch	6-27
Cursor Cues	6-28
Review Questions	6-13

Lesson 7

The Solids Toolbar

Move Face	7-2
Extend or Contract Body	7-3
Toggle Precise UI	7-4
Solids Editing Tools	7-5
Review Questions	7-5

Lesson 8

The Precise Input Toolbar and the Collaboration Toolbar

Relative Origin	8-1
Relative Orientation	8-2
Delta Input	8-2
The Collaboration Toolbar	8-4

Lesson 9

Sheet Metal Tools

Settings	9-1
Flat Pattern	9-5
Face	9-6
Contour Flange	9-7
Cut	9-9
Flange	9-10
Hem	9-11
Fold	9-12
Corner Seam	9-13
Bend	9-14
Hole	9-15
Corner Round	9-15
Corner Chamfer	9-16
View Catalog	9-17
Insert Design Element	9-18
Create Design Element	9-21
Create Work Plane	9-23
Work Axis	9-20
Work Point	9-24
Review Questions	9-26

Lesson 10

Hole Features

Learning Objectives	10-1
Edit Hole	10-7
Review Questions	10-12

Lesson 11

Constructing Geometry

Learning Objectives	11-1
Creating a Hole	11-5
Adding a Cut Feature	11-7

Lesson 12

Adding Fillets and Chamfers

Learning Objectives	12-1
Constant Fillet	12-1
Chamfer –Equal Distance	12-2
Modify Chamfer	12-3
Variable Fillet	12-4
Chamfer Distance-Angle	12-8
To Delete Fillets and Chamfers	12-9
Quickly Add Fillets	12-10
Review Questions	12-14

Lesson 13

Patterns

Learning Objectives	13-1
Circular Pattern	13-5
Modifying a Circular Pattern	13-7
Review Questions	13-8

Lesson 14

Lofting

Learning Objectives	14-1
Creating a Loft	14-5
Modifying a Loft	14-6
Review Questions	14-9

Lesson 15

Creating a Base Sweep

Learning Objectives	15-1
Paths	15-3
Create Work Plane	15-3
Create Cross-Section	15-4
Creating a Sweep	15-5
If the Sweep gives an Error	15-6
Review Questions	15-8

Lesson 16

Creating Sheet Metal Parts

Learning Objectives	16-1
Sheet Metal Styles	16-2
Creating a Face	16-3
Creating a Flange	16-4
Creating an Offset Flange	16-7
Adding a Hole Feature	16-8
Adding a Rectangular Pattern	16-10
Adding Corner Chamfers	16-13
Creating a Flat Pattern	16-14
Review Questions	16-16

Lesson 17

Creating a Basic Part

Learning Objectives	17-1
Extruding a Profile	17-2
Extrude to a Plane	17-4
Creating a Concentric Hole	17-4
Adding Constant Fillets	17-5
Edit Fillet	17-6
Insert Design Element	17-7
Creating a Rectangular Pattern	17-12
Creating a Rib	17-13
Adding Fillets to a Rib	17-15
Review Questions	17-17

Lesson 18

Drawing Management

Learning Objectives	18-1
Create View	18-2
Change View Orientation	18-4
Projected View	18-5
Auxiliary View	18-6
Section View	18-7
Detail View	18-8
New Sheet	18-9
Draft View	18-9
Edit Sheet	18-10
Create a Sheet Format	18-11
Define New Title Block	18-12
Property Field	18-14
Fill/Hatch Sketch Region	18-15
Creating a Custom Title Block	18-17
To Modify a Property Field	18-19
Copying Title Blocks	18-24
Managing Views	18-24
Edit View	18-25
Rotate View	18-26
Modifying Line Styles and Colors	18-27
Change View Name	18-28
Copying Views	18-28
Deleting Views	18-29
Sketch Overlay	18-30
Sketched Symbols	18-31
Define New Symbol	18-32
Add Symbol to a Drawing	18-33
Drawing Borders	18-34
Insert Drawing Border	18-35
Define New Border	18-37

Lesson 19

Drawing Annotation Toolbar

General Dimension	19-2
Ordinate Dimension Flyout	19-3
Ordinate Dimension Set	19-4
Ordinate Dimension	19-5
Hole/Thread Notes	19-6
Center Mark	19-6
Center Line	19-8
Center Line Bisector	19-8
Centered Pattern	19-9
Surface Texture Symbol	19-10
Weld Symbol	19-13
Feature Control Frame	19-17
Feature Identifier Symbol	19-18
Datum Identifier Symbol	19-19
Datum Target	19-20
Text	19-22
Leader Text	19-23
Balloon/Balloon All	19-24
Parts List	19-26
Changing the Heading Location of a Parts List	19-28

Lesson 20

Orthographic Views

Learning Objectives	20-1
Create a Base View	20-1
Create a Projected View	20-3
Create Isometric View	20-5
Add Dimensions	20-6
Deleting Dimensions	20-7
Create Hole/Thread Notes	20-7
Editing a Hole Note	20-8
Move Dimensions	20-9
Dimension Standards	20-9
Create a Center Mark	20-10
Create Centerline	20-10

Lesson 21

Auxiliary Views

Learning Objectives	21-1
Create an Auxiliary View	21-1
Edit Auxiliary View	21-4

Lesson 22

Section Views

Learning Objectives	22-1
Create a Section View	22-1
Edit Section View	22-3

Lesson 23

Detail Views

Learning Objectives	23-1
Create a Detail View	23-1
Modifying a View Label	23-4
Dimensioning a Detail View	23-4

Lesson 24

Drafting Standards

Learning Objectives	24-1
Creating a Part Template	24-3
Creating a Drawing File Template	24-6
Dimension Style	24-8
Common	24-9
Centermark	24-11
Surface Texture	24-12
Weld Symbols	24-13
Control Frame	24-14
Balloons	24-15
Parts List	24-16
Sheet	24-17
Datum Target	24-18
Hatch	24-19
Dimension Style	24-20
Display	24-21
Text	24-22
Prefix/Suffix	24-23
Terminator	24-23
Tolerance	24-24
Options	24-25
Review Questions	24-26

Lesson 25

Assembly Tools

Learning Objectives	25-1
Placing the First Component	25-3
Place Component	25-4
Create Component	25-5
Pattern Component	25-7
Place Constraint	25-9
Mate Constraint	25-10
Angle Constraint	25-10
Tangent Constraint	25-10
Insert Constraint	25-11
Motion Constraints	25-12
Replace Component	25-16
Replace All	25-17
Move Component	25-18
Rotate Component	25-19
Section Views of Assemblies	25-20
Component Visibility	25-21
Occurrence Properties	25-22

TIP: All the drawing files used in this text can be downloaded for free from the Schroff Development Corporation website at <http://www.schroff1.com/inventor/>.

Lesson 26

Bottom Up Assembly

Learning Objectives	26-1
Part 1 – Base	26-1
Part 2 – Blade	26-24
Part 3 – Front Handle	26-27
Part 4 – Blade Handle	26-30
Fastener Library	26-35
Insert Fastener	26-38
Place Constraint	26-41

Lesson 27

Top Down Assembly

Learning Objectives	27-1
Part 1 – Hinge Bracket	27-1
Part 2 – Hinge	27-12
Part 3 – Bolt	27-24
Grounding Parts	27-26
Assembling the Model	27-27
Modifying a Constraint	27-28
Interference Checking	27-29
Editing Parts in an Assembly	27-31
Modifying a Work Plane	27-32
Degrees of Freedom	27-33
Moving an Assembly	27-34

Lesson 28

Presentations

Learning Objectives	28-1
Presentation View Management Tools	28-2
Create Presentation View	28-3
Tweak Components	28-4
Precise View Rotation	28-5
Animation Tool	28-6
Creating a Presentation View	28-8
Adding a Tweak	28-9
Delete a Tweak	28-10
Tweak Options	28-10
Modifying a Trail	28-11
Add a Trail	28-11
Copying an Exploded View	28-12
Creating an Animation	28-12
Review Questions	28-16

Lesson 29

Assembly Drawings

Learning Objectives	29-1
Trail Properties	29-4
Modifying Trails	29-5
Drawing Annotation Toolbar	29-6
Add Balloons	29-7
Insert Parts List	29-9
Edit Parts List	29-11
Review Questions	29-13

Suggested Exercises

Appendix A Toolbars

Appendix B Shortcut Keys
